PROFESSIONAL SUMMARY

Electronic Engineer and Software Developer with over 9 years of experience leading and building large-scale technological solutions for fintechs, digital banking, and e-commerce. Specialized in mobile ecosystems and frontend web architectures, with a strong focus on resilience, Clean Architecture, Feature Flags, metrics, vulnerability mitigation, and performance optimization.

TECHNICAL SKILLS

Mobile & Frameworks: Flutter, React Native, React, Vue.js (v2/v3).

Languages & Core: TypeScript, JavaScript (ES6+), Dart.

Backend & Cloud: Node.js, Express, Fastify, MongoDB, RESTful APIs, Firebase, Google Analytics, Amplitude.

DevOps, QA & Tools: Unleash (Feature Flags / A/B Testing), Git, CI/CD (Jenkins, Fastlane), Cursor (AI-assisted workflows), Jira.

PROFESSIONAL EXPERIENCE

Senior Software Engineer · itti

November 2024 – November 2026

- Led the technical release cycle with continuous deployments to production for core mobile and web digital banking solutions, ensuring secure transactions and high availability.
- Implemented and orchestrated Feature Flags (Unleash) for progressive rollouts, massive segmentation, and A/B testing, enabling kill switches and zero-risk releases.
- Designed and developed Backend-Driven UI (BDUI) architectures using Node.js BFFs to control Flutter layouts dynamically without requiring app store updates.
- Built decentralized architectures, reusable components, and reactive design patterns.
- Accelerated the delivery cycle and increased code coverage through AI-assisted workflows (Cursor), automating unit test generation and optimizing Pull Request analysis.

Frontend Developer · Goiar

October 2023 – November 2024

- Developed a fintech platform for grain trading and settlement using React and TypeScript.
- Built a mobile application with React Native focused on onboarding flows and identity validation for e-commerce.
- Configured and maintained CI/CD build pipelines for Android (APK/AAB) and iOS (IPA), and resolved critical vulnerabilities identified during pentesting.

Full Stack Engineer / Tech Lead · Radium Rocket

April 2018 – May 2023

- Led frontend teams in international fintech projects (MERN Stack) and US/Canada real estate platforms (MEVN Stack).
- Architected internal libraries and design systems used by multiple development cells (Storybook).
- Implemented rigorous unit testing (Vitest, Jest) and provided technical mentoring to junior and trainee developers.

Full Stack & Embedded Systems Developer · TBM

November 2015 – April 2018

- Developed real-time web interfaces connected to industrial sensors for process variable measurement and control.
- Integrated MongoDB databases and programmed microcontrollers coupled with electronic instrumentation.

EDUCATION

Electronic Engineering
Universidad Nacional de Rosario (2010 – 2018)
